PROFESSIONAL SUMMARY

Dedicated BS Software Engineering fresher Graduate with 3+ months of private mathematics tutoring experience for 9th-grade students and proven leadership as Final Year Project (FYP) leader. Combines strong analytical skills from software development with effective communication, patience, and classroom management abilities. Technically proficient in frontend development with React, responsive design, and the MERN stack, with a portfolio of live projects featuring CRUD systems and dashboard structures. Passionate about making mathematics accessible and engaging, seeking to apply teaching experience and technical expertise as a Mathematics Teacher while contributing to student academic excellence.

SKILLS

Programming Languages:	JavaScript (ES6) HTML5 CSS3 Python Java C++
Frontend Technologies:	React Bootstrap Responsive Design Cross-Browser
Backend Technologies:	Node.js Express Flask REST APIs
Databases:	MySQL MongoDB
Development Tools:	Git GitHub VS Code Chrome DevTools NPM
Cloud & Deployment	Netlify Vercel Railways Render
Currently Learning:	MERN Stack (MongoDB, Express, React, Node.js)
Soft Skills:	Adaptability Problem Solving Team Collaboration Communication Teamwork

EDUCATION

BS Software Engineering | University of Sindh Jamshoro | 2022 – 2025 | CGPA: 3.04/4

Courses: Fundamental Programming C++ | OOP Java | Data Structures and Algorithm | Database Management System | Web Development | App Development | Cloud Computing | Service Oriented Architecture | Computer Communication and Networking | Database Administrations | Operating Systems | Project Management | Software Requirement and Specifications.

PROJECTS

AI-Powered Construction Cost Estimator (FYP)

[demo: construction-estimationss.netlify.app](#)

React | Bootstrap | Python | Flask | MySQL

Key Features:

- Developed an AI-powered full-stack web application for predicting construction costs and project durations.
- Built a responsive front-end interface using React and Bootstrap for a seamless user experience.
- Engineered a robust backend API with Python and Flask to handle prediction logic and data processing.
- Integrated a MySQL database for managing project data and user information.
- Implemented multi-input support, including manual forms and voice input for flexibility, and generated detailed expert reports in PDF format.

MERN Stack Todo Application

[demo: merntodoss.netlify.app](#)

MongoDB | Express | React | Node.js

Key Features:

- Built a full-stack task management application with complete CRUD (Create, Read, Update, Delete) operations.
- Designed a clean user interface with task filtering options for "All," "Completed," and "Pending" tasks.
- Gained practical experience in the MERN stack by connecting a React frontend to a Node.js/Express backend with a MongoDB database.

Daily News - React News Aggregator

[demo: dailynewsapis.netlify.app](#)

React | JavaScript | CSS3 | News API

Key Features:

- Developed a dynamic news aggregator application using React to fetch and display real-time news.
- Integrated a News API to provide content across 7 distinct categories.
- Implemented a search feature, enabling users to find news articles on specific topics.
- Built a fully responsive interface for a consistent experience across all devices.

Core Boards - Task Management Dashboard

[demo: coreboards.netlify.app](#)

React | CSS3 | JavaScript | localStorage

Key Features:

WORK EXPERIENCE

Web Development Intern | Digital

Empowerment Network | Remote | Intensive 6-week project-based internship | July - 2025 – Sep 2025

Achievements/Tasks:

- Built 3+ responsive mobile-first interfaces using HTML5, CSS3, and JavaScript
- Developed complete CRUD application with form validation and secure data handling
- Implemented Git/GitHub workflow with daily commits and effective branching strategy
- Ensured cross-browser compatibility and accessibility standards compliance
- Collaborated with team members in an agile development environment
- Participated in code reviews and implemented feedback for quality improvement

Project Leader | AI Construction Cost Estimator (FYP)

University of Sindh, Jamshoro | 2024 – 2025

- Led a team of 3 members to develop an AI-powered web application for construction cost estimation.
- Coordinated task distribution, code reviews, and project timelines.
- Designed system architecture and ensured seamless integration between
- React frontend, Flask backend, and MySQL database.
- Delivered final presentation and demonstration to faculty panel.

CERTIFICATES

Digital Empowerment and Network:

- Web Development Internship

IBM skillsbuild:

- AI Literacy
- Web Development Fundamentals

LinkedIn Learning:

- Getting Started as a Full-Stack Web Developer
- HTTP Essential Training
- JavaScript: Security Essentials
- React Essential Training
- Introduction to Prompt Engineering for Generative AI

- Built a task management dashboard with modular architecture and efficient state handling.
- Developed a full CRUD system with advanced filtering capabilities (All/Active/Completed).
- Integrated a weather search and a quote generator API to enhance user engagement and demonstrate API consumption.

Notes Application

[demo: notes-apps-js.netlify.app](https://notes-apps-js.netlify.app)

JavaScript ES6+ | HTML5 | CSS3 | localStorage

Key Features:

- Developed a client-side notes application with a clean dashboard structure for organizing notes.
- Implemented localStorage persistence to ensure notes survive page refreshes.
- Created a clean authentication flow (login/logout simulation) to showcase user experience design.

Portfolio Website

[demo: waris-072.github.io/my_portfolio/](https://waris-072.github.io/my_portfolio/)

React | CSS3 | localStorage

Key Features:

- Designed and developed a personal portfolio website using React with a modular component architecture.
- Implemented a theme preference feature (light/dark mode) that persists using localStorage.
- Created a responsive layout to showcase projects, skills, and professional information effectively.

- Prompt Engineering: How to Talk to the AIs
- Advanced Prompt Engineering Techniques
- Prompt Engineering with ChatGPT
- Prompt Engineering with Gemini

SimpliLearn skillUp:

- Generative AI for Beginners
- Introduction to SEO
- Project Management 101
- Getting Started with ReactJS Components

SimpliLearn powered by GoogleCloud:

- Introduction to Generative AI
- Gemini in Gmail
- Gemini in Google Drive
